

TRAN DINH TRUNG

DevOps Engineer | Operations Engineer | Cloud & Infrastructure

trandinhtrung255@gmail.com • +84 941 663 253 • Ho Chi Minh City, VN • <https://www.linkedin.com/in/trung-tran255/>

PROFESSIONAL SUMMARY

DevOps & Operations Engineer with 3.5+ years of experience designing resilient cloud-native infrastructure at scale. Hands-on expertise in Kubernetes, Kafka, ELK Stack, Terraform, and CI/CD pipelines. Proven track record: reduced deployment incidents by 70%, achieved 99.99% uptime across zero-downtime cluster migrations, and built an AI-assisted observability platform eliminating manual alert creation across 200+ microservices. Combines deep infrastructure engineering with automation-first thinking to accelerate delivery and harden production reliability.

WORK EXPERIENCE

Operations Engineer · [M_SERVICE \(MoMo\)](#) — Fintech | 50M+ Daily transactions Sep 2024 – Present

Project: Score Eye — AI-assisted observability platform

- ▶ **Architected & shipped** an AI-powered observability platform (Python) from scratch in 6 weeks that auto-generates Grafana alert rules from service metadata, eliminating manual rule creation across 200+ microservices.
- ▶ **Improved alert accuracy** from 65% → 92% and cut alert fatigue by 60% by integrating ML-assisted signal tuning via MoMo's Cursor-based AI coding framework.

Project: TELCO — Revenue Operations

- ▶ **Engineered real-time revenue milestone tracker** providing Business Units with automated notifications; reduced reporting latency from hours to near real-time.
- ▶ **Automated financial reconciliation workflow** by scripting partner data ingestion and distribution to Accounting via email pipelines, eliminating 100% of manual reconciliation tasks.
- ▶ **Implemented proactive inventory & fund depletion alerts**, mitigating potential service disruptions before they impacted end-users.

Infrastructure, Migration & Reliability

- ▶ **Orchestrated zero-downtime migration** of 2 Kubernetes clusters (UAT & PROD), mapping 100+ services, coordinating third-party integrations, and designing phased cutovers with auto-rollback — maintaining 99.99% uptime throughout.
- ▶ **Upgraded RabbitMQ & Kafka** across SCore cells (2 clusters, 20K+ queues); monitored 50M+ daily transactions post-upgrade with zero message loss.
- ▶ **Deployed Unleash feature-flag framework**, transitioning from direct config pushes to controlled rollouts — cutting deployment-related incidents by 70%.
- ▶ **Designed & implemented DR site** achieving RTO < 2 hours and RPO < 30 minutes, strengthening business continuity posture.
- ▶ **Led incident management for 15+ P1/P2 events**; updated 5+ runbooks based on findings from annual chaos engineering exercises.
- ▶ **Deployed ELK Stack (Elasticsearch, Kibana) on Docker** for distributed tracing and Kubernetes performance observability.
- ▶ **Integrated Kafka UI with Keycloak RBAC**, securing UI-based topic management and centralizing access control across teams.
- ▶ **Built internal Customer Service chatbot** integrated with order systems, eliminating 100% of manual data-fetching workload for Customer Service agents.

System Administrator · [DXC Technology](#)

May 2022 – Jul 2024

- ▶ **Provisioned Azure Landing Zones with Terraform (IaC)**, establishing secure, scalable cloud environments adhering to enterprise governance standards.
- ▶ **Administered Windows Server, Active Directory & WSUS** patch management for a multi-site enterprise environment.
- ▶ **Managed IAM using Okta & Microsoft Authenticator**, enforcing least-privilege access across cloud and on-prem systems.
- ▶ **Led infrastructure security implementation** directly contributing to the organization's attainment of ISO 27001 certification.
- ▶ **Configured & monitored NAS Synology and enterprise backup/recovery systems**, ensuring data integrity and minimizing RPO exposure.

IT Infrastructure Technician · [DXC Technology](#)

- ▶ **Configured site-to-site VPNs & Aruba AP12 wireless networks**: deployed endpoint security solutions (Trellix, Bitdefender).
- ▶ **Managed NAS RAID configurations and SQL database backup schedules**.
- ▶ **Set up Office 365/SharePoint/OneDrive policies**.
- ▶ **Handled Active Directory user lifecycle (onboarding/offboarding)** and oversaw IT hardware procurement & Capex/Opex budget planning.

TECHNICAL SKILLS

Container & Orchestration: Kubernetes, Docker, Helm

CI/CD & GitOps: GitLab CI, ArgoCD

Observability & Monitoring: Prometheus, PushGateway, Grafana, ELK Stack (Elasticsearch, Kibana), Splunk, On-call, SLA (15 minutes)

Message Brokers: Apache Kafka, RabbitMQ

Databases: MySQL, ScyllaDB/Cassandra, Redis, Oracle, RocksDB

Cloud & IaC: Microsoft Azure, Terraform

Scripting & Automation: Python, Bash Shell Scripting

Security & Identity: Keycloak (RBAC), Okta, Active Directory, ISO 27001

Feature Flags: Unleash

OS & Virtualization: Linux (Ubuntu), Windows Server, VMware ESXi

CERTIFICATIONS

- ▶ **AZ-104: Microsoft Azure Administrator Associate** — Microsoft
- ▶ **AZ-900: Microsoft Azure Fundamentals** — Microsoft
- ▶ **CCNA: Cisco Certified Network Associate** — Cisco
- ▶ **HPE6-A72: Aruba Certified Switching Associate** — HPE

EDUCATION

M.S. Computer Science (MCS), Specialization in Artificial Intelligence *Jun 2025 – Mar 2027*

Saigon International University

B.Eng. Electronics & Telecommunications *Jan 2018 – Dec 2022*

Ho Chi Minh City University of Science

AWARDS & RECOGNITION

Employee Excellence Award 2025 (2/46 members) — M_SERVICE (MoMo)

Best Incident Handling Team Award 2025 — M_SERVICE (MoMo)

LANGUAGES

Vietnamese (Native) • **English** (B1 VSTEP)
